

# Company Information

AirPhotoUSA® is a technology based company with a focus on having fun while providing the highest level of customer satisfaction in the industry. AirPhotoUSA maintains the largest off-the-shelf database of current, seamless, color, high resolution aerial imagery of the U.S. that is immediately available for delivery the way you want it.

AirPhotoUSA collects, produces and delivers digital aerial photography based visual information products faster, cheaper and better than any other source. AirPhotoUSA has and will continue to revolutionize the marketplace for current, visual, geographic information with readily available wide area coverage of high-resolution, highly accurate, visual information delivered at the lowest possible price.

AirPhotoUSA's exclusive technology is used to produce and employ digital aerial imagery, and enables the end user with advantages in speed, versatility, availability, accessibility, GIS compatibility, and low cost. We offer the largest U.S. archive of off-the-shelf, seamless coverage and deliver custom projects to customer specifications, on time and on budget. AirPhotoUSA has produced hundreds of thousands of square miles of seamless, color digital aerial photography since our beginning in 1997.

We are continually expanding and updating our high resolution color imagery archive that currently covers 75% of the U.S. population in 10,000 cities, plus we maintain the entire USGS DOQQ image library as a seamless 3,000,000 square mile nationwide base map.

All imagery products are produced in-house, ship with our award winning PhotoMapper software, and are supported by an exceptional staff dedicated to total customer satisfaction. PhotoMapper imagery blends fluidly with industry standard GIS, mapping applications and graphics programs and offers added value as a stand alone, network ready, easy to use, visual information solution.

AirPhotoUSA's unique and scalable process architecture has allowed us to continually generate larger coverage areas, at higher and higher resolutions with the fastest delivery schedule in the industry. AirPhotoUSA also offers valuable expertise in establishing and facilitating multiagency collaborative groups for large regional aerial base map projects. From vision to completion, our experience, support, commitment to value, unique capability to expedite projects and deliver technology, combine to exceed your specific needs for any size project.

*The AirPhotoUSA mission statement embodies our desire to lead by innovation, build by relationship and succeed through customer success. It simply states: NO LIMITS!*

**Award Winning Technology – Digital Impact Award & Most Innovative Technology**

**THE TECHNOLOGICAL EDGE FOR AERIAL INFORMATION SOLUTIONS™**
