Projects Suite

Project Tracking & Transaction Management System

REApplications Project Suite provides access anywhere/anytime from any Internet browser, wireless palm pilot or mobile phone. It enables instant access to any type of files including Leases, Floorplans, Spreadsheets and Photos. Clients and vendors are able to get "real-time" Project updates and reporting, reducing cycle times, boosting productivity and shrinking administrative costs. Manage all types of Real Estate transactions including Tenant and Landlord Representation, Acquisitions, Dispositions, Corporate Services, Strategic Planning, Build-to-Suit and many more.

Current Features Include

- = Unlimited Projects, Clients & Files
- = Milestones & Task management
- = Pipeline Reports to track sales & forecast revenue
- = Project Templates for all project types and client requirements
- = Integrated E-mail tool allows users to easily update clients and associates
- = File Cabinet for unlimited document management in any file format
- = Dynamic Timelines for visual overview of project status
- = Integrated Property Data sheets for all relevant property data
- = Flexible security to control access on a project by project basis

Manage Your Deals on the Web with REApplications Projects Suite

Contact Management Suite

Contact Relationship Management & Prospecting System

REApplications Contact Management Suite provides access anywhere/anytime from any Internet browser, wireless palm pilot or mobile phone. Manage your full spectrum of clients, prospects, vendors, tenants, owners and other property-related contacts. Flexible security enables sharing of public contacts while preserving private relationships, notes, tasks and events. Provides full integration with your Project and Property information.

Current Features Include:

- = The entire REApplications Projects Suite
- = Personal & Team Calendar for keeping track of your day
- = Export your Contacts to a variety of formats including Palm™
- = Unlimited Notes, Files & Tasks to track all Contact history
- = Easily generated groups for your marketing initiatives
- = View all Properties related to each contact
- = Dynamic security allows users to limit access by others in the company for any private contacts
- = Integrated Phone Messages and Call-back "tickler" system
- = View all relationships between your company and contacts

Track your clients and prospects with REApplications Contact Management Suite

Properties Suite

Property Inventory and Listing Management System

REApplications Properties Suite provides access anywhere/anytime from any Internet browser, wireless palm pilot or mobile phone. You can store all building and land data in any market your firm tracks, including Availability and Lease/Sale Comparables. In addition, you can manage portfolio or market data encompassing your full spectrum of listings, comps, market research data, transaction history and property-related contact information as well as generate summary reports and property profile sheets for internal and client viewing.

Current Features Include:

- = The entire REApplications Project Suite and Contact Management Suite
- = Detailed forms & views for most property types
- = View Tenant Rosters and Leasing History for any property
- = Lease Expirations & Lease Rates can be viewed by Tenant & by Property
- = Unlimited notes, files & images can be stored per property: photos, floorplans, site plans, leases, etc.
- = Summary and Detail Reports are automatically saved as Adobe Acrobat (PDF) files
- = Automatically generate and email marketing collateral
- = Full transaction history on each property include relevant contact information
- = Export your search results for custom reporting
